

SUJAL KUMAR

Generative AI Engineer

+91-9625066840 • sujal31122005@gmail.com • linkedin.com/in/SujalKumar • github.com/sujalkumar27 • Noida, UP, India

PROFESSIONAL SUMMARY

B.Tech CSE graduate (2025) with a strong foundation in Java, Spring Boot, Python, and backend development. Hands-on experience building GenAI applications including a production-style RAG pipeline, LLM-powered APIs, and vector database-backed document search. Oracle Certified Java Foundations Associate with 300+ DSA problems solved. Seeking to apply full-stack AI engineering skills to design and deploy scalable LLM-based systems.

TECHNICAL SKILLS

Languages	Python (primary), Java, SQL, JavaScript, HTML/CSS
LLM Frameworks	LangChain, LangChain-Community, LlamaIndex (learning), Groq SDK
GenAI / AI	RAG pipelines, Prompt engineering, Sentence-Transformers, Hugging Face APIs
Vector Databases	ChromaDB, FAISS (concepts), Pinecone (concepts)
Backend / APIs	FastAPI, Spring Boot, REST APIs, JSP/Servlets, SQLAlchemy, Pydantic
Databases	MySQL, Oracle 11g, SQLite (aiosqlite)
Cloud & DevOps	AWS (learning), Docker, Git, GitHub, CI/CD
Deep Learning	PyTorch (learning), Transformers architecture, Fine-tuning concepts (LoRA / PEFT)

PROJECTS

GenAI BFSI Copilot — Intelligent Banking Assistant | github.com/sujalkumar27/BFSI-Copilot

Tech stack: Python, FastAPI, LangChain, Groq (Llama 3), Sentence-Transformers, ChromaDB, PyPDF, SQLAlchemy, Docker

- Built a **Retrieval-Augmented Generation (RAG) pipeline** to answer banking policy queries using PDF documents
- Implemented **embedding pipeline** using Sentence-Transformers and stored vectors in ChromaDB for semantic search
- Designed **prompt-engineered LLM system** to generate accurate, context-aware responses
- Developed **Loan Advisory Assistant** using structured prompts for eligibility insights and recommendations
- Built **REST APIs using FastAPI** for document upload, query handling, and response generation
- Ensured **reduced hallucination** by grounding responses with retrieved document context
- Containerized application using Docker with deployment-ready architecture.

Spending Tracker | github.com/sujalkumar27/SpendingTracker

Tech stack: Java · MySQL · JDBC · Java Swing (GUI)

- Developed a desktop expense tracking application with categorisation, monthly trend analysis, and a Swing GUI — reduced simulated overspending by 30% in user testing.
- Implemented JDBC-based persistence with parameterised queries; modular OOP design following MVC principles.

EDUCATION

B.Tech — Computer Science & Engineering

Noida Institute of Engineering and Technology, Greater Noida

2021 – 2025 | CGPA: 8.19 / 10

CERTIFICATIONS & ACHIEVEMENTS

- Oracle Certified Foundations Associate — Java (2022) · Demonstrated proficiency in Core Java, OOP, and data structures.
- 300+ DSA problems solved on LeetCode and GeeksforGeeks · Maintained a 200-day coding streak on GFG and 50-day streak on LeetCode.
- Top 20 of 300+ participants — CodeTantra Coding Competition (NIET CS Department) · Won prize money.
